## History

**#1 - 10/18/2013 11:57 am - Nicolás Echániz**

*- Tracker changed from Bug to Task*

*- Target version deleted (lime-beta)*

**#2 - 01/17/2014 08:56 am - Gioacchino Mazzurco**

Is synctincvpn decentralized?

I didn't understand well how it works.

In case it is centralized i do prefer to use a plain git repository + cron ( as we do with isole VPN ), or use git-annex that provide git + p2p sincronization
